Crestwood office expands and gets a makeover

In 2005, Absolute Vision Care celebrated its 20th anniversary. We value the relationships we have built with our clients and decided to expand and remodel our

Crestwood location to increase our ability to serve.

We are proud to announce that the expansion of our Crestwood location is nearly completed.

Our newly renovated and larger facility is better equipped to meet the needs of all of our patients.

We are now an ADA compliant office and are able to work with those who have special needs for eyecare.

The addition of two exam rooms will enable the doctors to see our growing patient base more efficiently and comfortably while still delivering the personalized care you have

Our new frame fitting area includes custom oak cabinetry that displays our wide selection of regular and designer frames.

grown accustomed to.

The new specialty testing room, as well as our examination rooms carry state of the art technology to assist our doctors and staff in diagnosing and treating ocular emergencies, infections, and disease that could seriously affect your vision if left untreated.

Our new frame selection area has been enlarged and includes custom oak cabinetry that displays a wide selection of regular and designer frames that will suit every patient's needs. And of course, we still use the latest technology in our eyeglass

lenses and contact lenses.

Our reception area is larger with more comfortable seating and a 42" plasma television so patients can relax while waiting to see our doctors.

We appreciate your patience during the construction. Thank you for your loyalty and support.

Stop by to see our "new" office and look for an announcement about our grand re-opening in the fall!

We look forward to serving you for the next 20 years!
